AHEX TECHNOLOGIES

Founded:
July 2009

About Us:

Founded in July 2009, Ahex Technologies is an ISO 9001 certified software development company. We are provider of customized web application, mobile application and e-bussiness solutions across the globe. Our services are known for uncompromised quality and support. We have been quite successful in a short span of time as it is shown by our increasing client base across the globe.

We have a diverse portfolio which includes end to end application development using different technologies which meets and matches the client requirements. We continuously keep our team updated with the best practices followed in the industry to make sure that our clients always get the best of the industry and aim to exceed the client expectations.

Team:

Originally a small group of like minded people, we've now grown to a team of 125+ outstanding people, all with the same passion and commitment to produce excellent applications for all our clients.

Clients:

We have served over 90 clients, ranging from large scale industries to individual entrepreneurs. We have successfully marked our presence in India, Canada, Singapore, Europe, USA and Gulf Countries.

Our Mission:

To accelerate business by providing innovative solutions and quality services.

Our Vision:

To become largest service provider in our chosen technologies by providing innovative solutions and quality products.

AI ENABLED APPLICATION DEVELOPMENT

Our experienced team has successfully developed AI-enabled applications. We've leveraged AI to develop solutions ranging from chatbots and virtual assistants to complex recommendation systems and predictive analytics models. Our expertise extends to platforms such as Azure AI and OpenAI, enabling us to create applications that understand natural language, analyze images, and make data-driven predictions.

Our approach begins with a thorough understanding of your goals and requirements. We then design and develop AI solutions that align seamlessly with your business processes. Whether it's chatbots for customer engagement, predictive models for data-driven insights, or automation for efficiency, we ensure your AI application delivers real value.

- **Natural Language Processing Applications**
- **Image and Video Analysis Solutions**

- **Seamless ERP Integration Services**
- **Tailored ERP Development**
- **Strategic ERP Consulting**
- **Efficient Cloud-Based ERP Solutions**
- **Proactive ERP Maintenance and Upgrades**

ENTERPRISE PORTALS

Enterprise portals provide a secure unified access point, often in the form of a web-based user interface and are designed to aggregate and personalize information through application specific portlets.

Web portals have become integrated "anytime—anywhere access" platforms for information delivery, communication, collaboration and automating business processes through interconnected applications and web services.

For us an enterprise portal is a framework for integrating information solutions, employees, customers, and processes across organizational boundaries. We have expertise to ensure that you leverage technology to the maximum and grow your business rapidly.

Our expertise help create value-adding portal solutions tailored to your needs and continuously improve and extend them by integrating new modules.

Ahex delivers end-to-end **Enterprise Portal** solutions embracing the latest technologies and business trends:

- B2C and B2B Ecommerce Portals
- Social Networks and Communities
- News and Entertainment Portal
- Business Intelligence Portal
- Knowledge Management Portal
- Application/Web Services Portals

Good user interface design facilitates finishing the task at hand without drawing unnecessary attention to itself. The goal of user interface design is to make the user's interaction as simple and efficient as possible, in terms of accomplishing user goals. At Ahex, Graphic designers use various methods to create and combine words, symbols, and images to create a visual representation of ideas and messages. Our graphic designers use a combination of typography, visual arts and page layout techniques to produce a final result.

We design flexible layouts which smoothly translate across multiple devices, platforms and screen sizes. One design stage, one build stage and one size to maintain. We make these sites look fantastic, so you feel proud of them and your customers love using them.

OPEN SOURCE CMS

A Web content management system is a bundled or stand-alone application to create, deploy, manage and store content on Web Server. Content Management has many roles in today's market - place and is an important base for any website blogging, articles, news, description of products etc. A Web CMS can catalog and index content, deliver to specific visitors in a requested way with Multilingual Support.

From humble beginnings to powering some of the biggest sites on the planet, open source CMS platforms have evolved into world-class software platforms. Each one has been developed and maintained by a community of thousands. Not only is each one free to download, but the open source format means that the platform is continuously being improved to support new challenges and technologies.

CMS Platforms We Work On

- ▶ Wordpress
- ▶ STRAPI

WORDPRESS

ECOMMERCE & ONLINE PAYMENTS

In the last few years E-commerce growth was driven by rapid technology adoption led by the increasing use of devices such as smartphones and tablets, and access to the internet through broadband, 3G etc. Which led to an increased online consumer base. At Ahex, we understand how online shopping works and utilizes best-practice software architecture approach and techniques to allow the E-commerce solution to grow smoothly and expand both vertically and horizontally.

We have been building custom E-commerce solutions for clients that has helped them in growing their businesses to vaster dimensions. We offer full-cycle development for online payment processing which include credit card processing, mobile payments, online wallets and other billing system.

DEDICATED DEVELOPMENT TEAMS

We have dedicated and excellent resources if you need to have complete control over human and technical resources involved in the development process. This service enables you to optimize savings and augment your in-house technological staff with your chosen dedicated developers that are committed to your unique business and IT requirements.

We have a large pool of multi-disciplinary resources to organize a tailored dedicated development team for an extended period of time. It can easily be integrated with your existing team or work as a separate extension of your business.

MAINTENANCE & SUPPORT

It is not always reasonable to have an in-house support team with the experience you need once in a while. There are different maintenance and support challenges which demands new models that are not based on resource numbers alone but also teams now need to have a deep understanding of the business, Agile processes and of the industry best practices.

Our Support professionals are continuously educated and trained to address the needs of your business. They are ready to help you in your day to day IT Support as well as fixing critical issues, to make sure your online business run smoothly.

Good application programs can not overcome bad database designs and the existence of a DBMS does not guarantee good data management, nor does it ensure that the database will be able to generate correct and timely information.

Ahex database consultants develop the strategic roadmap to guide you to a reliable and optimized database environment by assessing your needs and recommending viable options for developing a reliable, scalable and manageable database environment.

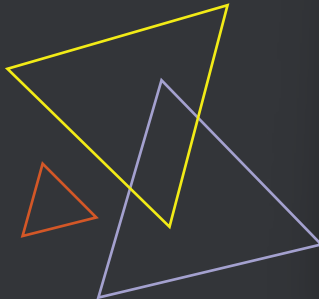

We develop new databases, optimize and increase performance of old databases by studying existing data and sources and maintain existing databases.
