

# Intranet Portal & iOS/Android App Dev for IT Company

## PROJECT DETAILS

 Mobile App Development

 Jan. 2014 - Ongoing

 Confidential

“

*"[They] provide a highly-personalized service."*

## PROJECT SUMMARY

Ahex Technologies Pvt. Ltd. developed a client-facing mobile app with geolocation features as well as an intranet portal for employees. They provide ongoing support for any updates that need to be made.

## PROJECT FEEDBACK

Their team produced bug-free products per specifications and had no issues with taking on change requests. Ahex Technologies' patience, flexibility, and cooperative approach contribute to the collaboration's long-standing success.

## The Client

Introduce your business and what you do there.

I'm the managing director of ZOOM Technologies. We're an IT network and security company in India that also runs an academy, which offers networking and security courses.

## The Challenge

### What

We needed to build an app.

**Noble Mohsin**  
Managing Director, ZOOM  
Technologies

**IT Services**

**Hyderabad, India**

### CLIENT RATING

**5.0**

Overall Score

Quality: 4.5

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

We gave them several small projects, including mobile app development and the creation of an intranet portal, which automated the entire billing and training related modules. The mobile app is for our customers and was built for both iOS and Android platforms. It has several geolocation functionalities, among other things.

### What is the team composition?

We've only been in touch with the project manager since we prefer having just one point of contact. I don't know how many people were involved beyond that.

### How did you come to work with Ahex Technologies

A friend of mine worked with them before and said that they were quite cost-effective.

### What is the status of this engagement?

We began working with them several years ago.

## The Outcome

### What evidence can you share that demonstrates the impact of the engagement?

Ahex Technologies delivered the service and solutions we wanted, which is how I measure the success of the project. Both products work well and haven't had any bugs. The mobile app is even being downloaded by people in the U.S. Additionally, they support us whenever we need to change things from time to time. Overall, we're happy with their work.

## How did Ahex Technologies Pvt. Ltd. perform from a project management standpoint?

Our technical team interacted with them. I wasn't involved in the day-to-day operations, but I presume they did a good job as my team didn't have any complaints.

Our project wasn't completed on time, but the delay was due to us changing some of the specs along the way.

## What did you find most impressive about them?

They're flexible, accommodating, patient, and provide a highly-personalized service. Ahex Technologies is growing quite a lot now.

## Are there any areas they could improve?

They don't promote themselves well, so they should look into more marketing.

## Do you have any advice for potential customers?

They're a good team, and I wouldn't hesitate to recommend them to anyone.
