🏷 Custom Software Development

📅 Jan. 2017 - Oct. 2018

💲 $10,000 to $49,999

" *"I am impressed with their work. I suggest improving their tech documentation."*

PROJECT SUMMARY

Ahex Technologies developed a backend REST services for an IT services firm's IoT product. Tech stack includes PHP, AWS, and MySQL.

PROJECT FEEDBACK

Thanks to the contributions of the Ahex Technologies team, the client was able to launch a high-quality project under the schedule. The client was most impressed with the vendor's ability to quickly overcome the most complicated technical obstacles.

The Client

Please describe your company and your position there.

I was the President of an IT services firm, a software development company based in the USA.

The Challenge

### For what projects/services did your company hire Ahex Technologies , and what were your goals?

I first hired to develop a backend REST services for our client's IoT product, Due to the small size of our internal development team and the lack of resources, we could not develop this product in the timeframe the business demanded. We approached Ahex and asked them to investigate if they could complete the project within the budget and timeframe.

CLIENT RATING

5.0
Overall Score

Quality:	5.0

Schedule:	5.0

Cost:	5.0

Would Refer:	5.0

The Approach

How did you select this vendor and what were the deciding factors?

We reviewed their website and reviews online before contacting them to start initial conversations. We asked to talk to previous customers to find out if they were a reliable development partner. We decided to go with Ahex because their references were very good and they were by far the most responsive and professional company out of all being considered.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

We supplied them with a very detailed scope. We also had a weekly review meeting with Ahex tech team. Tech Stack: PHP, AWS, MySQL

How many people from the vendor's team worked with you, and what were their positions?

Their team consists of six Sr. developers and one Project Lead.

The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

They delivered a high-quality product. We were able to launch the project as per the schedule.

Describe their project management style, including communication tools and timeliness.

The project management was great. We used to communicate via WhatsApp and weekly review meetings.

What did you find most impressive or unique about this company?

Their ability to quickly overcome the most complicated technical obstacles is a rare talent.

Are there any areas for improvement or something they could have done differently?

I am impressed with their work. I suggest improving their tech documentation.
