

Custom WordPress Website for Privacy Monitoring Company

PROJECT DETAILS

 Web Development

 Jan. 2015 - Ongoing

 \$10,000 to \$49,999

"Ahex Technologies is very accommodating. We have a great working relationship."

PROJECT SUMMARY

Based on a design prepared in-house, Ahex Technologies developed a fully customized informational WordPress website. They used PHP and Angular as their technologies of choice and maintained regular contact.

PROJECT FEEDBACK

Ahex Technologies delivered an attractive and cutting-edge redesigned website that positions the company as a leader in the current market. The team was highly flexible to secure client satisfaction, rapidly completed their work, and communicated responsively.

The Client

Introduce your business and what you do there.

I am the founder and CEO of Intruno, formerly known as Cognetyx. We provide privacy monitoring services for the healthcare industry and have created a software product.

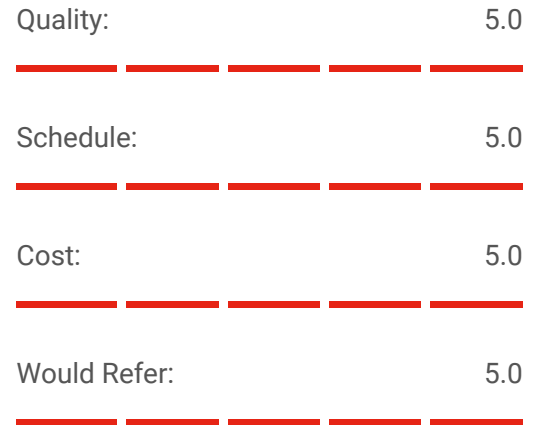

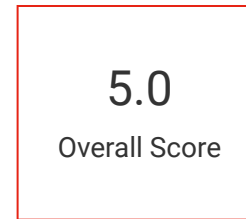

-  CEO, Privacy Monitoring Company
-  IT Services
-  Texas, United States

The Challenge

What

Primarily, we wanted to redesign our website. It was outdated and antiquated. Ahex Technologies provided all the work we needed to do so.

CLIENT RATING

The Approach

What was the scope of their involvement?

Our website mainly provides content for our users. Ahex Technologies fully customized the platform for us. They were responsible for developing the new design we prepared.

We communicated a lot back and forth as we worked together. The technologies and frameworks they used in the development process included WordPress, PHP, and Angular.

What is the team composition?

The team we work with from Ahex Technologies is composed of a few junior developers and a project manager. The founding partner also participates.

How did you come to work with Ahex Technologies?

I found Ahex Technologies via Upwork. Based on their positive reviews from past clients, I chose to interview and hire them.

How much have you invested

We've probably spent between \$25,000–\$50,000.

What is the status of this engagement?

Our engagement began around 2015 and is ongoing. Ahex Technologies completed the bulk of the work for this project within a few weeks. They've provided management over many years and make any changes that need to happen.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

Ahex Technologies

Ahex Technologies is very accommodating. We have a great working relationship.

Since the site is not for e-commerce, I don't have any quantitative measures. Qualitatively, the website looks very nice and up-to-date. It shows that our company has a modern presence in the industry.

How did Ahex Technologies perform from a project management standpoint?

Ahex Technologies is efficient about moving through the timeline. If I need any changes, they quickly turn around work within a day or less. They communicate very well via email and Skype chat. I don't have any complaints about them at all.

What did you find most impressive about them?

Ahex Technologies' most impressive strength is their responsiveness. They are quick to return our messages and complete tasks. Within their company, they have a vast set of skills. If I want to develop an app someday, they could help me do that. They employ many specialized resources like graphic designers I can pull in, as I have done in the past. Those are the main benefits of working with their team.

Are there any areas they could improve?

My main constructive feedback would probably be to use a project management tool in addition to email and Skype. I think that could be useful and make communication better.

Do you have any advice for potential customers?

My advice for future clients is to make sure the developer they hire has sufficient experience. Outsourced companies often try to use the lowest-cost resources. Make sure they are assigning the right quality team to your project.
