

Graphical Interface Dev for Software Testing Company

PROJECT DETAILS

 BI & Big Data Consulting & SI

 Jul. 2014 - Jul. 2018

 \$200,000 to \$999,999

"We were looking for expertise and quality work from contractors within budget, Ahex fits well within that calculus."

PROJECT SUMMARY

Ahex Technologies Pvt. Ltd. provided graphical interface development for a software testing services company. The goal was to create a feature-rich frontend integrated into the analytics software.

PROJECT FEEDBACK

Ahex Technologies Pvt. Ltd. successfully developed the frontend which was used to demo for various clients. The software was subsequently used by financial institutions. The team was prompt in delivering a high-quality product.

The Client

Please describe your company and your position there.

I was the project manager of the EMScope project in Integral Development Corp. for which Integral contracted Ahex for a web-based graphical front end.

The Challenge

For what projects/services did your company hire Ahex Technologies Pvt. Ltd.?

EMScope is an analytics software with a feature-rich front end.

What were your goals for this project?

My project goal is to customize the graphical interface of EMScope for various client deployments.
