

# Web Platform Dev for Blockchain Company

## PROJECT DETAILS

 Custom Software Development

 Oct. 2017 - Ongoing

 Confidential

“*Ahex is different because they take responsibility for the project and are invested in its success.*”

## PROJECT SUMMARY

Ahex Technologies build a web-based blockchain application that allowed a digital currency company to trade and exchange Bitcoin.

## PROJECT FEEDBACK

As a result of the partnership with Ahex, the initial development stages ended with a functioning MVP that could be shared with potential clients and investors. The team provided valuable input throughout the process and showed a consistent level of involvement.

## The Client

Introduce your business and what you do there.

I am the CEO at a blockchain company. We're building a cryptocurrency exchange for a client.

## The Challenge

What

We needed a partner to help us build our web application.

 CEO, Blockchain Company

 IT Services

 Singapore

### CLIENT RATING

5.0

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

### What was the scope of their involvement?

They developed a web-based platform to allow a digital currency company to trade and exchange Bitcoin.

### What is the team composition?

There was a team of around nine people from Ahex.

### How did you come to work with

Their co-founder is a friend of mine. We had worked together in the past and decided to collaborate again in the early stages of this project.

### What is the status of this engagement?

We started working together in October 2017 and the work is ongoing.

## The Outcome

### What evidence can you share that demonstrates the impact of the engagement?

Ahex's efforts made a significant difference in the success of our product. Because of their reasonable cost, I was able to hire them to help me push through the initial stages and produce a minimum viable product (MVP) to share with potential users. The team really helped us fill in the gaps as we moved through the development process.

### How did

The CEO effectively manages the project. We use an agile methodology.

## What did you find most impressive about them?

I appreciate Ahex's commitment to our project. In my experience with other outsourcing companies, generally, if they run into issues they will either give up or try to argue the cost. Ahex is different because they take responsibility for the project and are invested in its success. Their team was able to turn out project around for the better within the first month of our engagement.

## Are there any areas they could improve?

Each developer has their own individual weaknesses.

## Any advice for potential customers?

I recommend clients provide concrete documentation outlining the functionality requirements at the beginning of the project. With this information, they can work quickly and efficiently.
