

Web & Mobile App Dev for Email Service Platform

PROJECT DETAILS

 Mobile App Development

 Aug. 2016 - Jul. 2017

 \$10,000 to \$49,999

"Each phase was completed within our deadlines, and the final outcome was lauded by all our stakeholders."

PROJECT SUMMARY

Ahex Technologies Pvt. Ltd. helped build the web, iOS, and Android versions of an email service platform. Technologies for the project included Java, Spring, MySQL, Bootstrap, HTML, and Angular.

PROJECT FEEDBACK

The process ran smoothly, and Ahex Technologies Pvt. Ltd. added considerable mobility to the finished product. They adapted quickly, and were always flexible and communicative. They suggested useful alternatives to meet scheduling and budgetary requirements.

The Client

Please describe your company and your position there.

Keastone Labs is working on central hub system for managing email, calendars, social media, and other information in one place. I'm the co-founder and director.

 **Rajesh Shanmugam**
Director, Keastone Software Labs

 **IT Services**

 **Bengaluru, India**

The Challenge

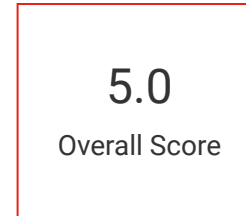

For what projects/services did your company hire Ahex Technologies Pvt. Ltd.?

We wanted a mobile and web development team to work with our internal staff on our product.

What were your goals for this project?

We hoped to develop an advanced email and chat service platform for web, iOS, and Android use.

CLIENT RATING

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

How did you select this vendor?

A friend who used them for a similar engagement gave me their contact information and recommended them. We interviewed them and felt they were a perfect fit.

Describe the project and the services they provided in detail.

They worked with us to develop the web and mobile app. For the web version, a backend developer created a REST API using Java, Spring and MySQL, while another developer built the frontend with Bootstrap, HTML, SCSS, and an integrated API with Angular. A mobile development team built the iOS and Android versions.

What was the team composition?

Our project manager was the principal point of contact, and the rest of the team included two mobile developers and three web developers.

The Outcome

Can you share any information that demonstrates the impact that this project has had on your business?

They helped speed the development process and added mobility to the platform. They quickly adapted to our needs and were efficient workers. Each phase was completed within our deadlines, and the final outcome was lauded by all our stakeholders.

How was project management arranged and how effective was it?

We communicated with their team on a daily basis through email, phone, and video conferencing. We also used Trello to track tasks,

log issues, and monitor the project. They made sure the entire process was transparent.

What did you find most impressive about this company?

Throughout our engagement, their flexibility and willingness to accommodate our work hours was impressive. They suggested useful alternatives to keep our costs down and our timeline running smoothly. During scheduled demos, they went out of their way to make sure everything went according to plan and made sure there were no hiccups. They provided great support and made sure upgrades were seamless. They were proactive throughout the entire life cycle of the project.

Are there any areas for improvement?

There are no significant areas they should improve. Working with them was a pleasure, and I would definitely recommend them to anyone.
