

Website Development & Design for Online Real Estate Platform

PROJECT DETAILS

 Web Design, Web Development

 Nov. 2018 - Ongoing

 \$50,000 to \$199,999

"Ahex Technologies treats our product as if it were their own."

PROJECT SUMMARY

Ahex Technologies was hired to optimize a real estate portal for a client. The team went through brainstorming sessions before delivering web design and development services. They also created a WordPress site.

PROJECT FEEDBACK

The team at Ahex Technologies delivered a functional portal for the client. They're dedicated, supportive, and hardworking. Customers can expect a creative team that strives to learn the core of their business.

The Client

Introduce your business and what you do there.

I'm a co-founder and the CTO of GharOffice.com, a real estate portal where people can post properties and make inquiries. I make decisions on what technology we should use.

 **Himanshu Kumar**
Co-Founder, GharOffice

 **IT Services**

 **India**

The Challenge

What challenge were you trying to address with Ahex Technologies?

There's a huge market in India. We have 100,000 daily users, so we were looking to optimize our system for that kind of load.

CLIENT RATING

5.0

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

The Approach

What was the scope of their involvement?

Ahex Technologies provides web design and development services. We had a brainstorming session to discuss the requirements, and their business analyst took it from there. After they did some research, they came up with wireframes.

The technologies used are AngularJS, .NET MVC, Xamarin, and Bootstrap. They also developed an informational WordPress website for us. Users can search by area code, value, and house composition.

What is the team composition?

We've worked with one business analyst, two UX/UI designers, 4-5 full-stack developers, and 2-3 Xamarin developers.

How did you come to work with Ahex Technologies?

I'd worked with large organizations, and it was hard to get people to take responsibility. I found that a smaller startup team would do best. That's the reason I chose Ahex Technologies.

How much have you invested with them?

The main project cost around 50-60 lakh Indian rupees (approximately \$67,000–\$81,000 USD).

What is the status of this engagement?

Our engagement with Ahex Technologies started in November 2018. We have a smaller scope now, and we're working with them as needed.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

The portal is live. Everything that can be seen on it is Ahex Technologies' work.

How did Ahex Technologies perform from a project management standpoint?

We released an MVP and continued enhancing it in two-week sprints. We have a CI/CD model, and I'm satisfied with their team.

We've used Jira, Teams, and email for communication and SharePoint for storing documents.

What did you find most impressive about them?

Ahex Technologies treats our product as if it were their own. If there's a production issue, they'll call us at midnight. They're very supportive, and they've made our lives easy.

Are there any areas they could improve?

We've given their resources feedback at times, but I don't see any problems overall. Their dedicated team has never given us a chance to complain.

Do you have any advice for potential customers?

Ahex Technologies does research and learns the client's business. They don't just work based on the requirements. They're a good choice for someone looking for a creative team.
